Career Counseling

- Are you satisfied with your current career?
- Would you like to develop your career &/or income?
- Do you have stress related work issues?
- Are you being “power harassed”? If so, how do you manage this situation?
- Has your company gone through a corporate restructuring?
- Have you lost your job, or are you in fear of losing your job?
- Planning a career change truly is a life decision. We at Strategic Consulting Japan are here to offer neutral, professional advice.
- Some things to consider when making a career change; how will this impact your future 5-10 years down the road?
- What are your long-term career goals, how will this change positively/negatively impact those goals?
- Why are you feeling restless in your current role, and have you discussed this with your superiors?
- Moving solely for the purpose of more money is not always the best decision.
- More important than money is the business challenge, professional development, long-term career path and job satisfaction. This is not to say you can't or shouldn't negotiate a better package; however this should not be the primary reason for changing your job/career.
